

The Federal Communications Commission

Dear The Federal Communications Commission,

I do not want to pay more for my telephone service! I urge you to reject a flat fee proposal that would change how contributions are made to the Universal Service Fund. I am concerned that this proposal could make my current service unaffordable.

Under the flat fee proposal you are considering, people who make few long distance calls would pay the same as people or businesses that make many calls. In other words, low-volume and primarily residential customers would bear the same universal service fund burden as a high-volume residential or business customers. This is unfair!

I use my wireless phone for safety, security and convenience. I don't want to lose these benefits so that big businesses can pay less than their fair share. I urge you to reject the proposal to move the USF collection system to a flat-fee.

As it is i cannot afford a land line for my home. The last land line i had for my home cost my almost eighty dollars just to set on a table in my house.

This tracfone is the only way i can afford to keep in contact with my family while i am at work. I live in one town in one state and work in another town in another state. Please leave things as they are so that i can keep in touch with my children while I am at work

Keep the USF Fair!

Sincerely,

REBECCA SHELDON
